

Figure (1): ROC curve of QTc duration for discrimination between compensated (Child A) and decompensated liver cirrhosis (Child B + C).

	QTc
AUC	0.816
Standard error	0.0521
95% confidence interval	0.707 to 0.897
p-value	<0.0001
Cut off value	>0.39
Sensitivity	91.67 (80.0 - 97.7)
Specificity	58.33 (36.6 - 77.9)
